

The mysterious biology of classic Hodgkin lymphoma (cHL)

What kind of genomic alterations lead to the development of cHL?

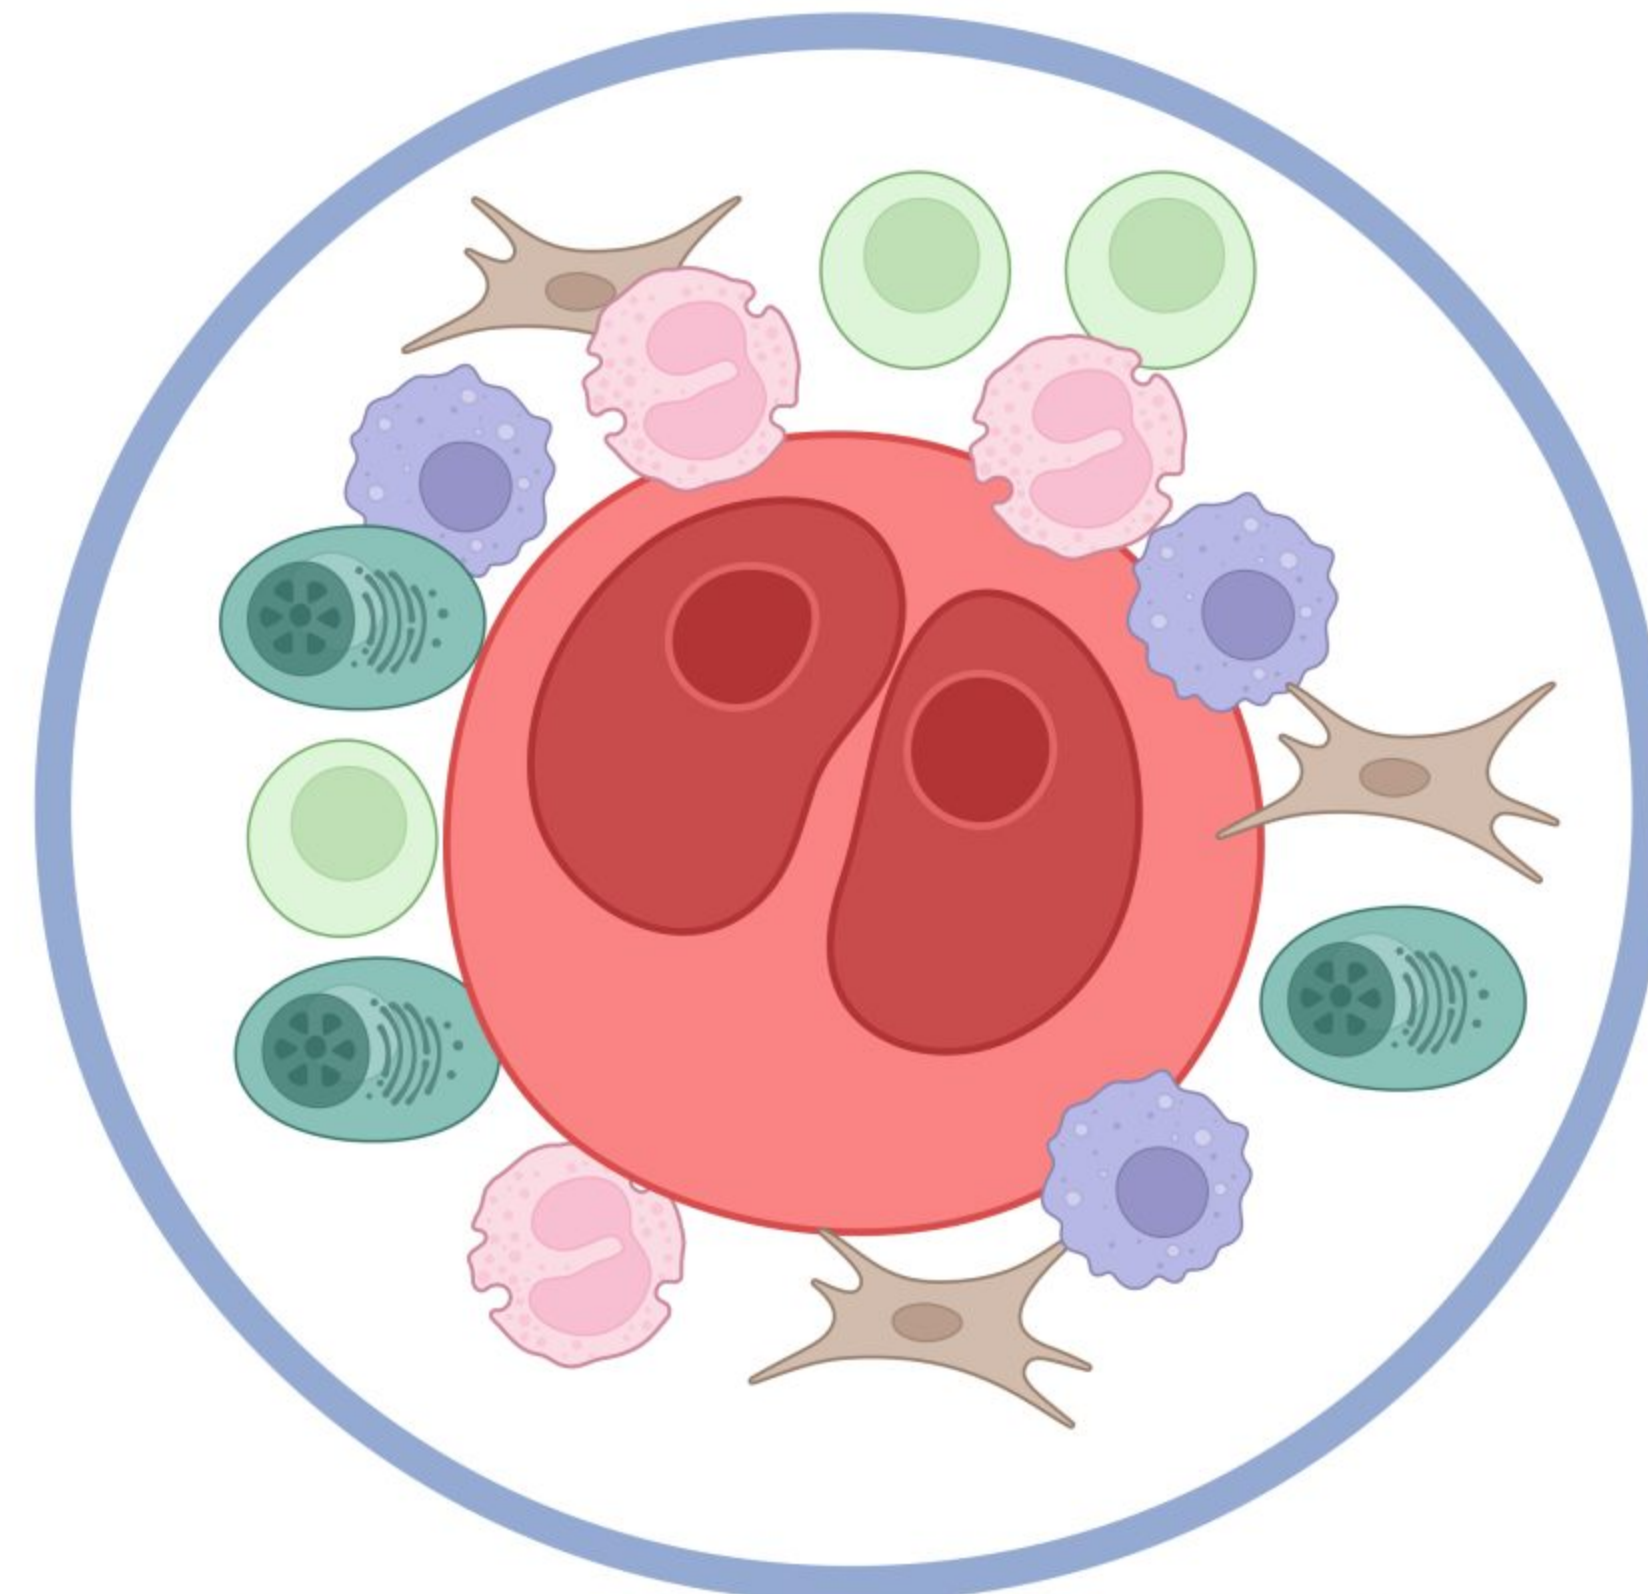

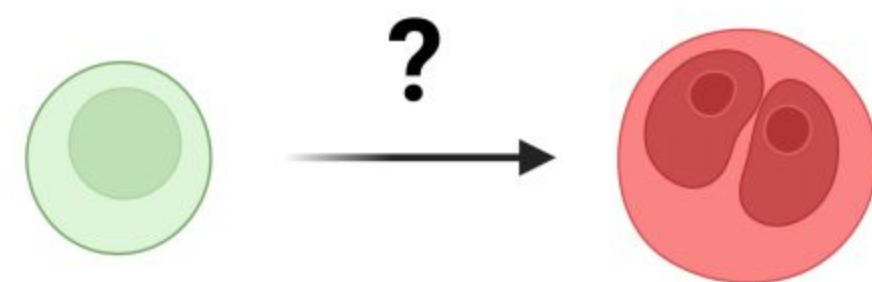

What is the cause of the loss of B cell characteristics of HRS cells?

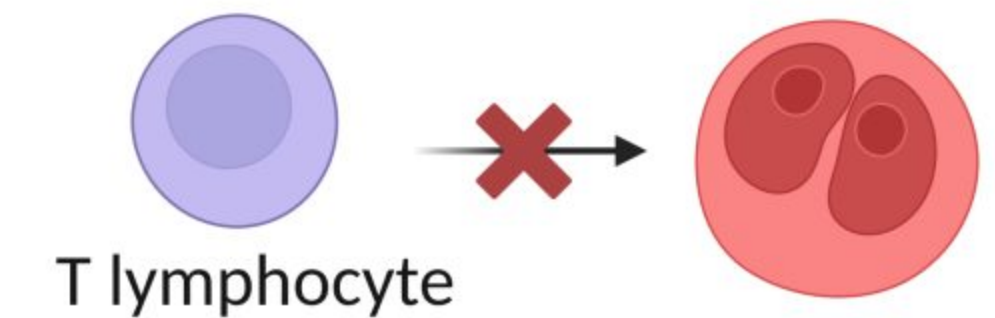

What cell type do Hodgkin and Reed-Sternberg (HRS) cells derive from?

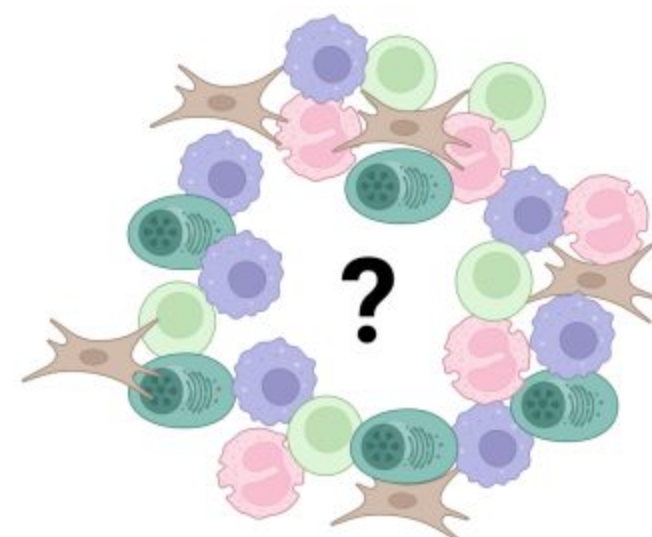

What is the mechanism of formation of Reed-Sternberg multinucleated cells?

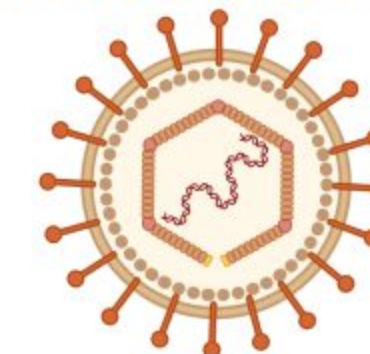

What is the immune evasion mechanism of HRS cells?

How is the complex microenvironment of cHL formed?

What is the role of Epstein-Barr virus infection in cHL?

What is the role of CD30 antigen expression on the surface of HRS cells?
